MacksThis is essential if you want to keep your sanity in today's modern workplace. Remember man wasn't built to be confined in semi-solitary cubes living a sedentary life. Nature had designed us as hunter gatherers and for most of our existence this is just what we were. However with the advent of the industrial revolution man and woman left the farms and fields and headed to the cities and factories. The end result is that many of us now work indoors, at desks. This situation is anti-thetical to man's true nature and in response some of us have gone literally.... quite mad. This book tells you how to recognize these mad-persons who invariably either have dominion over you or report to you. Sitting behind a desk all day is torturous enough combine it with crazed, dangerous bosses and angry/lazy subordinates and you've a recipe for your own trip to the looney bin. This book helps you recognize the players, navigate the treacherous waters and possibly, save your sanity to boot.
