**Nicholas Apostolides : Management Accounting for Beginners (Routledge Focus on Business and Management)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Management Accounting for Beginners (Routledge Focus on Business and Management):

Accounting skills are increasingly important in many walks of life. In education, these skills are becoming vital beyond business, accounting and economics students; in work, accounting is no longer an outsourced specialism across all sectors. This concise book provides readers with a primer on accounting which focuses on its uses for managers. Beginning with the basics of financial accounting, the main part of the book focuses on the more applicable role and use of management accounting. Topics covered include budgeting, break-even analysis, performance measurement, and investment appraisal. Features to aid understanding include worked activities; discussion points and numerical example with answers. With additional online resources for further study, this unique and focused text will be welcomed by all those looking to develop an employable competency in accounting and finance.

'This book, particularly suitable for those with limited financial and accounting expertise, explains accounting concepts. The well designed activities and examples provide strong emphasis for financial managers' - Vasco Vendrame, Senior Lecturer, The University of the West of England, UK  
About the Author Nicholas Apostolides is Senior Lecturer in Accounting and Finance at the University of the West of England, UK
