By Mike Mertens
This is an extremely powerful work on how to achieve mastery in one's life. Mastery can be thought of as the unique way each of us can fully actualize our potential for greatness and enjoy a fulfilling life. Achieving Mastery in life is a lot of work but it is the way to a flourishing life (a life of self-fulfillment). Spinoza's quote "All things excellent are as difficult as they are rare" came to mind several times as I read the book. The author provides ideas and strategies that can improve the process for those willing to expend the effort. I plan to re-read and work with the ideas and strategies covered in this book and apply them to my personal context. I also plan to purchase copies of the book for my wife and 2 teenage sons so they can benefit from this material as well. The work begins by

discussing how to discover one's purpose in life. This is unique to each individual and needs to be well thought through. The author gives 5 strategies for finding your life's task and illustrates these strategies with historical and contemporary figures. Two of the strategies he discusses that really gave me a lot to think about are: 1.) Occupy the perfect niche - the Darwinian strategy. In this strategy you need to find the career niche that best fits your interests and talents and then evolve that niche over time. I found the example of V.S. Ramachandran very interesting 2.) Let go of the past - the adaptation strategy. The following quote from this section that really resonated with me: "You must adapt your Life's Task to these circumstances. You do not hold on to past ways of doing things, because it will ensure you will fall behind and suffer for it. You are flexible and looking to adapt." The author then covers the Apprentice Phase which he breaks into 3 steps: 1.) Deep Observation - the Passive Mode 2.) Skills Acquisition - the Practice Mode 3.) Experimentation - The Active Mode There are detailed strategies for completing the ideal apprenticeship. These are illustrated by examples. 2 of my favorites in this section were "move toward resistance and pain" as illustrated by the example of Bill Bradley and "apprentice yourself in failure" as illustrated by Henry Ford. All 8 strategies are worth thinking about in detail. The next section covers learning through a Mentor and is one of the best parts of the book. The example of Michael Faraday is used as a great illustration. There are strategies discussed for finding the appropriate mentor(s), knowing when to break away from the mentor and what to do if you cannot find a mentor (the example here is Thomas Edison and there is an interesting tie-back to Faraday). Having a mentor is the most effective way to gain deep knowledge of a field in the least amount of time - it greatly accelerates that path to Mastery. The next section deals with social intelligence and seeing people as they are. Benjamin Franklin is used as an example. There are 7 deadly realities covered in this section (envy, conformism, rigidity, self-obsessiveness, laziness, flightiness and passive aggression) as well as strategies for acquiring social intelligence. The fifth section is on awakening the dimensional mind. This is where you see more and more aspects of reality and develop ways to become more creative (and not get stuck in the past). There are several strategies on creativity discussed in detail. I found the discussion on ways to alter one's perspective especially illuminating. These include avoiding: * Looking at the "what" instead of the "how" * Rushing to generalities and ignoring details * Confirming paradigms and ignoring anomalies - (key quote: "...anomalies themselves contain the richest information. They often reveal to us the flaws in our paradigms and open up new ways of looking at the world") * fixating on what is present, ignoring what is absent (Sherlock Holmes example) The section continues with strategies and examples for this "creative-active" phase. My favorite was a section on Mechanical Intelligence with the Wright Brothers as an example. The Final Section is on Mastery as the fusing of the Intuitive with the Rational. The strategies in this section are very powerful and I will be returning to them again and again. Here are the 7 strategies: 1.) Connect to your environment 2.) Play to your strengths (this is very important - see further thoughts on this below) 3.) Transform yourself through practice 4.) Internalize the details - the life force (Leonardo Da Vinci example) 5.) Widen your vision 6.) Submit to the other - the Inside Out perspective 7.) Synthesize all forms of knowledge This is a very powerful book filled with a lot of good ideas and strategies. There are ideas I plan to continue to "chew" on and think more deeply about while I work to integrate these ideas and strategies into my personal context. A lot of the book stresses the importance of self-discipline, persevering through difficult challenges, the importance of an adaptive and active mind, independent thinking and integrating all of one's knowledge. Here are a few recommendations I would make to augment the material covered in this book: 1.) For Self-Discipline and Willpower (and perseverance): Willpower by Tierney and Baumeister The Power of Habit by Duhigg Grit (see TED Talk by Angela Duckworth and the GRIT assessment as well - Grit Assessment can be found at: available at [...]) 2.) For an adaptive/active mindset (and recovering from failure) Mindset by Carol Dweck Adapt by Tim Harford 3.) For a great fictional example of many of the ideas covered in the book, I would recommend Ayn Rand's The Fountainhead (Roark as a positive example; Keating as a negative example of what the author calls "the false self") 4.) Other Real world examples Richard Feynman (see his books "Surely You're Joking, Mr. Feynman" and "The Pleasure of Finding Things Out") 5.) Finding your strengths Strengthsfinder 2.0 by Tom Rath VIA Survey of Character Strengths (available at [...]) 0 of 0 people found the following review helpful. Excellent overview!!! By Gerhard Hachmann Mastery is probably one of the best books I have ever read and I about 4-times re-read. If you are interested how to become a "Masterrdquo; in anything, or more importantly become successful at anything, this book is the big opus. Supported by great biographical examples, the book gives you a blueprint of what has to happen for you to become a success. Robert Greene analyses each step of the long process, from the attitude for learning to the discipline of working. Throughout the book he dispenses of the many myths we, as people and as societies, tell ourselves that hinder us to become successful. He will not give you small self-help tricks, but allow you to get the 10,000 feet view of the whole journey. 2 of 2 people found the following review helpful. A Great Influence on My Life By Stephen Mikolaitis Well researched, written, and told. I stumbled onto this book after briefly hearing it mentioned and realized it was keeper within the first few pages. This book did a wonderful job illustrating many of the desires and thoughts I had throughout my life and has rekindled something in me to push myself toward those endeavors again. Not in some mystical pseudoscience type of way however, Robert Greene's Mastery is well researched in the lives of living and past masters of craft and is told in an easy, fluid, and enjoyable manner that keeps turning the page to learn more.

The #1 New York Times-bestseller from the author of *The 48 Laws of Power* Each one of us has within us the potential to be a Master. Learn the secrets of the field you have chosen, submit to a rigorous apprenticeship, absorb the hidden knowledge possessed by those with years of experience, surge past competitors to surpass them in brilliance, and explode established patterns from within. Study the behaviors of Albert Einstein, Charles Darwin, Leonardo da Vinci and the nine contemporary Masters interviewed for this book. The bestseller author of *The 48 Laws of Power*, *The Art of Seduction*, and *The 33 Strategies of War*, Robert Greene has spent a lifetime studying the laws of power. Now, he shares the secret path to greatness. With this seminal text as a guide, readers will learn how to unlock the passion within and become masters. From the Trade Paperback edition.
