**Victoria Yudin : Microsoft Dynamics GP 2010 Implementation** before purchasing it in order to gage whether or not it would be worth my time, and all praised Microsoft Dynamics GP 2010 Implementation:

0 of 0 people found the following review helpful. easy read, great.By TGIVLiked the structure of book, ease of reading.A few things needed more explanation but it was still very well explained.Recommend it0 of 0 people found the following review helpful. SuperbBy F. Garcia-hillyerThis book covers all aspects of the implementation, its good for beginners to advanced users and best of all its not a tedious read, it can go very quick.I would definitely recommend this book to anyone interested in Dynamics GP0 of 0 people found the following review helpful. Excellent Comprehensive and Practical Guide to Implementing GPBy SESeveral years ago, I had a client who wanted to to have their internal staff help implement, configure, and support their Dynamics GP installation. They essentially asked, "How do we learn everything we need to know about Dynamics GP?". Naturally, the client didn't want to send several people to expensive off-site training, and wanted practical knowledge that the employees could immediately apply to their specific GP implementation. I wish I would have had a copy of Victoria's book back then. It is much more

concise and practical than the dozens of GP user manuals, and vastly more efficient than attending two weeks of training to get up to speed with Dynamics GP. Packt Publishing was gracious enough to send me a complimentary evaluation copy of Victoria's new book, and it is amazing how much content she has packed into just over 300 pages. The book is an excellent guide to the entire Dynamics GP implementation process--not just the installation, or configuration, or module specific features, but also the planning and design process that is essential to properly implementing GP. Obviously, a 300 page book can't exhaustively cover every possible Dynamics GP topic. The book covers the "core" Dynamics GP modules, such as GL, AP, AR, SOP and POP, but doesn't cover the many other Dynamics GP modules available, as that would result in an encyclopedia. And you will still need to know, or research on your own, what a SQL transaction log backup is and how you should structure your chart of accounts. And, of course, there is still a lot of knowledge and expertise required to determine how many of the hundreds of Dynamics GP options should be configured to meet a specific customer's business requirements--which is why there are many GP partners and consultants available throughout the world who have spent years working with Dynamics GP. But for anyone looking to have a single, comprehensive Dynamics GP handbook, I would strongly recommend purchasing a copy of Microsoft Dynamics GP 2010 Implementation. It's a great, low cost investment to help you get more value out of your Dynamics GP solution.

A practical, focused tutorial, this book provides a step-by-step guide to planning and carrying out your Microsoft Dynamics GP 2010 implementation. Detailed descriptions and illustrations of setup screens and real-world examples are also included for the Dynamics GP system and core modules. This book focuses on Dynamics GP 2010, however, most of the concepts and explanations will apply to any Dynamics GP version. If you are a new or existing Microsoft Dynamics GP consultant or end user who wants to implement, install and set-up core modules of Dynamics GP 2010, then this book is for you. A basic understanding of business management systems and either Dynamics GP or a similar application is recommended.

About the Author Victoria Yudin Victoria Yudin has almost 20 years of experience in designing, implementing, integrating, and customizing business management and accounting systems. She has been a user of Microsoft Dynamics GP (and its Great Plains Software predecessor) for almost 20 years and a consultant for Dynamics GP for over 12 years. Victoria currently holds certifications from Microsoft for Dynamics GP, FRx Financial Reporting and Small Business Financials. She has an undergraduate degree from the Wharton School of Business at the University of Pennsylvania and is the only person in the world who has been named a Microsoft Dynamics GP MVP each consecutive year starting with 2005. In November of 2000 Victoria started Flexible Solutions, Inc. to bring together her experience in accounting and business with her love of technology. Flexible Solutions is a Microsoft Gold Certified Dynamics GP Partner offering the GP Reports Viewer add-on for Dynamics GP as well as Dynamics GP customizations and support. In September of 2008 Victoria started her blog, called 'Ramblings and musings of a Dynamics GP MVP' (<http://victoriayudin.com>) to share her experience and thoughts with the Dynamics GP community.
