Victoria Yudin : Microsoft Dynamics GP 2013 Implementation before purchasing it in order to gage whether or not it would be worth my time, and all praised Microsoft Dynamics GP 2013 Implementation:

0 of 0 people found the following review helpful. It is an amazing guide. One has to simply follow the sequence ...By CustomerIt is an amazing guide. One has to simply follow the sequence suggested in the guide for implementation and the result is outstanding. It is a 'must read' guide for GP 2013 implementation. May be, the 'Reporting' section could have been dealt in little more detail. Overall, it is a very useful guide.1 of 1 people found the following review helpful. Great bookBy sally higginsVictoria Yudin is amazing and does a super job. This is a very comprehensive guide and very well written. Laid out well0 of 0 people found the following review helpful. Just reviewed Victoria Yudin's new book for GP implementationsBy SheilajrI've been implementing Microsoft Dynamics GP since 1998 and was given a copy of this book to review.Microsoft Dynamics GP 2013 Implementation is a great resource for all levels of expertise. I found that her book thoroughly covered implementation from beginning to end. She covers not only the job of implementing the software but also how to plan before and after implementation including what kind of training should be considered. There are many helpful hints that you won't find in any of the documentation manuals. Even the

most experienced implementer will find something they can learn from. I've been implementing Dynamics GP since version 2 and found some helpful suggestions that I had not thought of before. I highly recommend this book for anyone looking for a comprehensive resource to help with their Microsoft Dynamics GP implementations.

In Detail Microsoft Dynamics GP 2013 is a sophisticated Enterprise Resource Planning system with a multitude of features and options. The implementation of Dynamics GP is usually considered to be complex, and can be very confusing for both end users and consultants. Microsoft Dynamics GP 2013 Implementation will show you how to effectively implement Dynamics GP 2013 with ease. "Microsoft Dynamics GP 2013 Implementation" is a focused, step-by-step tutorial covering the basics of Microsoft Dynamics GP, from licensing to design, before moving on to more complex topics such as implementation planning, installation, setup, and training. Learn how to plan and execute your Dynamics GP implementation from start to finish. You will start off by learning how to plan a successful Dynamics GP 2013 implementation. You will then move on to learn the important questions to ask, the key setup details that should be decided upfront, and how to plan the infrastructure. Detailed descriptions of all the setup options for the core Dynamics GP modules as well as practical advice on setup will guide you through the myriad of options available in this powerful application. This book will also cover how to import initial data and how to find out what additional resources and tools are available for Microsoft Dynamics GP. With many detailed and practical examples, "Microsoft Dynamics GP 2013" Implementation will help you plan and complete a successful Microsoft Dynamics GP 2013 implementation. Approach A step-by-step guide for planning and carrying out your Microsoft Dynamics GP 2013 implementation. Detailed descriptions and illustrations of setup screens and practical examples and advice are included for the Dynamics GP system and core modules. Who this book is for If you are a new or existing Microsoft Dynamics GP consultant or an end user who wants to implement, install, and set up core modules of Dynamics GP 2013, then this book is for you. A basic understanding of business management systems and either Dynamics GP or a similar application is recommended.

About the Author Victoria Yudin Victoria Yudin has been designing, implementing, integrating, and customizing business management and accounting systems for over 20 years. She has been a user of Microsoft Dynamics GP (and its Great Plains Software predecessor) since it was available on DOS and has been a Dynamics GP consultant for almost 15 years. Victoria has the distinction of being the only person in the world named a Microsoft Dynamics GP Most Valuable Professional (MVP) each consecutive year since 2005. She has also been on the DynamicsWorld's Microsoft Dynamics Top 100 Most Influential People list each year since 2010. Victoria has also been in the top 10 of Doug Pitcher's "most famous, awesome and totally influential Dynamics people" list for all 3 years it has been published. (<http://bit.ly/18UaKkL>) Victoria has an undergraduate degree from the Wharton School of Business at the University of Pennsylvania, and has numerous certifications for Microsoft Dynamics GP and related technologies. In November 2000, Victoria started Flexible Solutions, Inc. to bring together her experience in accounting and business with her love for technology. Flexible Solutions (www.GPReportsViewer.com) is a Microsoft Dynamics GP Partner, offering the GP Reports Viewer add-on for Dynamics GP, as well as Microsoft Dynamics GP implementation, reporting, and support services. In September 2008, Victoria started her blog, called Ramblings and musings of a Dynamics GP MVP (<http://victoriayudin.com>) to share her experiences and thoughts with the Dynamics GP community. Currently Victoria's blog gets more than 45,000 hits per month. Victoria also regularly helps fellow Dynamics GP users and consultants on many of the Dynamics GP online forums, including Experts Exchange, where she has earned the rank of Wizard. Victoria previously authored the Microsoft Dynamics GP 2010 Implementation book and has had articles published on MSDynamicsWorld.com and in the GPUG Magazine.
