Just before I left for a trip to London I finally received your new book from . I absolutely devoured it during my trip. It really is a great piece of work. Everyone has stories to tell and you have certainly collected and transcribed a wonderful collection in my mind. The Editor's Notes are also extremely well written showing that you have a great talent yourself. As an example, I happened to have visited Cincinnati and Kentucky for an extended period of time during 2016. I know you hold this area of the world close to

your heart as you have a heritage there. Your description of the countryside and the lifestyle you so eloquently capture so magically in a just a few words are a wonderful testament to your own writing ability. This is true in all of the Editor's notes. Put it on your bucket list to try authoring a memoir one day. Just one minor criticism though. Your coin the term which stands out as your brand 'My Job' - 'My Self'. You don't refer to the 'self' part much during the book. Regardless, I am not sure this really fully captures the theme of the book. I get what you are alluding to in terms of 'self realization, finding ones place, self satisfaction, etc' and all of those warm and fuzzy personal attributes so important to a successful job experience. However, having worked in Silicon Valley for 35 years, I have run into other ego connotations of 'My Self' such as self aggrandizement, talking but not listening, personal put downs, pulling rank, etc. I don't quite agree with Makana that it would be best to get rid of 'My Self' but in my humble opinion think that the theme of the book is better captured through the brand 'My Job' - 'Our World'. 1 of 1 people found the following review helpful. Amazing human stories about work, culture, and changing roles of women. By Customer Suzanne Skees captures amazing human stories about work, culture, and the changing roles of women. They are told in each individuals voice which makes them even more interesting. I could relate due to my own travels but I learned so much more from reading this book. In our current environment, we can all learn from these incredible stories and I highly recommend the book, My Job... 1 of 1 people found the following review helpful. A great book to gain perspectives and clarity. By Chris A fascinating overview of jobs around the world designed to give you perspective and clarity. I found it to be a really good "pick up" book where you can pick and choose chapters and jump to various perspectives depending on your interest at the time. The subjects are well chosen and you get a real sense of their struggles and triumphs.

MY JOB: Real People at Work Around the World, is a collection of vivid first-person accounts of real people in unique jobs, in the U.S. and the world. Never before has such a collection of stories been gathered. Building upon the legacy of Studs Terkel's 1970s bestseller Working, MY JOB goes global and updated, reflecting the daily struggles and successes of working storytellers in their own distinctive voices. MY JOB explores then dignity, identity, economic viability, and inherent challenges of each occupation. How has the definition and notion of a job shifted in recent years? How does one land in a particular job, and what causes one to flourish or flounder in it? How does our job shape our sense of identity? And how does an identity built around work impact other facets of our lives? As communications and social media transform our world into a global village, readers are exposed to life and work in other places. Our awareness of countries and cultures far beyond home leads to a natural interest in them. This is a pivotal moment in which geography still greatly impacts employment; yet the experiences of others, even in distant countries, are more accessible today than ever before.

"As someone who's committed to finding ways for people doing good work to connect, MY JOB is a must-read. It brings to life actual work experiences across the world, showing that we have a lot in common. MY JOB illustrates that we're not alone." - Craig Newmark, Founder of Craig's List
