V. Kostakis, M. Bauwens : Network Society and Future Scenarios for a Collaborative Economy before purchasing it in order to gauge whether or not it would be worth my time, and all praised Network Society and Future Scenarios for a Collaborative Economy:

2 of 4 people found the following review helpful. Succinct, rich and very timely
By John Zee Succinct, rich and very timely. Thank you for sketching the big picture, Bauwens and Kostakis. Rich rich references.

This book builds on the idea that peer-to-peer infrastructures are gradually becoming the general conditions of work,

economy, and society. Using a four-scenario approach, the authors seek to simplify possible outcomes and to explore relevant trajectories of the current techno-economic paradigm within and beyond capitalism.

About the Author Vasilis Kostakis is a political economist and founder of the P2P Lab. He is also a research fellow at the Ragnar Nurkse School of Innovation and Governance at Tallinn University of Technology, Estonia, and a collaborator of the P2P Foundation. Michel Bauwens is the founder of the Foundation for Peer to Peer Alternatives (P2P Foundation). Among others, he is one of three co-founders and partners of the Commons Strategies Group and, in 2014, he worked as the research director of the FLOK Society transition program in Ecuador.
