On Skidelsky's Keynes and Other Essays is a collection of essays, biographies, review articles and tributes, focusing on the lives and times of the Cambridge School of Economists, and the immense contribution that these thinkers, including the author, made to the discipline.

'Like his mentor Joan Robinson, Geoff Harcourt's writings combine personal conviction, a passion for justice, policy relevance and penetrating analysis. Harcourt has a unique voice that is increasingly rare, and hence increasingly valuable. These essays, like all of his writings, are marked by an authoritative command of both contemporary and historical literatures, and engaging writing radiating grace, style and wit. Harcourt continues to be an inspirational figure for those working in the history of economics, who also share a desire to be relevant to contemporary economics, to students of economics and to the world.' - Professor Avi Cohen, York University
