Strategies That WorkBy DiamondJagI anxiously awaited the publication of this book since I am always on the lookout for new trading ideas from Tom Bierovic. I first discovered Tom's work at one of the Futures Magazine Trading Seminars where he was a speaker. What caught my eye was the down to earth, solid, and workable trading principles he presented. I was also impressed that he had, for years, been a full time trader for his own account and was willing to share the ideas and systems that he actually used. "Playing for Keeps" is no exception. Tom lays out in detail three trading strategies that can be used in all markets and timeframes. The strategies are presented with numerous examples. I believe that with all of Tom's background in system research and development (he was head of system development for Omega Research and is currently writing a series of articles for Active Trader magazine), the fact that Tom chose these three strategies to present in his book gives me confidence that these strategies will make money if properly applied. (I would have given the book five stars if it had included Easy Language code)0 of 0 people found the following review helpful. Excellent Book Great setupsBy Viren BalsaraTom has been a successful trader and in the book he shares his simple but effective trade setups. Worth reading.13 of 13 people found the following review helpful. Clear and ConcreteBy Ace MageeFirst off, I'd like to say that for someone who loves technical indicators like the MACD and Parabolic Sar, I really enjoyed this book. Having read many books where technical indicators are simply described on their individual merits, it was wonderful to find a book where the author actually presented some systems in a concrete and clear manner.I'm sure you'll find this book very clearly written, with the 3 systems clearly illustrated with examples on the entry method along with a few exit methods.Before explaining his systems, the author presented some quite introductory materials on the technical indicators used - this is good and systematic, and certainly helps the beginner, but if you are an advanced trader with clear ideas of your own trading system, you may not find this book so useful.

Playing for Keeps in Stocks and Futures offers traders three winning strategies for trading stocks and futures under any market condition and within any timeframe-from one minute to one month. Tom Bierovic details his newly developed trading strategies-First Prize, R2D2, and Triple Play-and shows you how to integrate them with various technical indicators and analytical techniques to create low-risk, high-reward trading opportunities. Bierovic clearly explains the development of each system, lists the rules, and provides real-world examples from a wide variety of stocks and futures in several timeframes to illustrate how and why each strategy works so well. With these lessons, you'll quickly learn how to use Bierovic's original strategies to enter, manage, and exit your trades profitably. This complete guide to stock and futures trading opens with a brief introduction to price swings, impulse waves, corrective waves, and critical points and explains how the extreme and continuous variation in the duration and magnitude of price swings makes it possible for traders to speculate profitably. It also reveals the three components of a complete trading strategy-setups, entries, and exits-and how you should use them when trading with First Prize, R2D2, or Triple Play. Before entering into an in-depth discussion of these three winning trading strategies, Playing for Keeps in Stocks and Futures explains the tools used in them including: breakouts to new highs and lows, directional movement index spread (DMI spread), exponential moving averages (EMAs), Fibonacci retracement zones, Japanese candlestick charts, moving average convergence-divergence (MACD), parabolic stops, trendlines, true range and average true range (ATR). In explaining his three new trading strategies-First Prize, R2D2, and Triple Play-Bierovic breaks down each strategy into its setup, entry, and exit components and illustrates how to implement each strategy through charts, graphs, and vivid examples from both the stock and futures markets. Most importantly, you'll learn the unique qualities of each strategy and understand how the three strategies taken together can profit in any market conditions.(First Prize trades first pullbacks; R2D2 trades subsequent pullbacks; Triple Play trades trend reversals.)Take advantage of the tremendous opportunities offered to you by trading with First Prize, R2D2, and Triple Play. With these three strategies in your trading arsenal, you too will soon be playing for keeps in stocks and futures. Tom Bierovic, President of the Synergy Trading Group, has been trading stocks and futures successfully since 1971. Tom is also a popular and respected speaker: he has presented highly rated seminars on technical analysis and trading at major conferences throughout the United States and in more than 40 countries on six continents. Futures magazine, Futures World News, and Technical Analysis of Stock Commodities magazine have all published in-depth interviews with Tom, and he is featured in the book Real People, Real Traders by Ruggiero and Toghraie. For information on products and services offered by the Synergy Trading Group, you can contact Tom by e-mail at tbierovic@aol.com.

Take advantage of the tremendous opportunities offered to you by learning to trade with First Prize, R2D2, and Triple Play. With these three strategies in your trading arsenal, you too will soon be playing for keeps in stocks and futures.

From the Back Cover
Praise for *Playing for Keeps in Stocks Futures* "Wise traders seeking to improve their trading knowledge and skills are well advised to learn from the accumulated experience and knowledge of those who have already paid their dues, such as Tom Bierovic. Bierovic is an accomplished trader and an excellent teacher, and he provides indispensable and valuable information in his new book, which every serious trader should acquire and study. I heartily recommend it." -Edward D. Dobson, President, Traders Press, Inc. "In Tom's extraordinary no-nonsense way, he has presented so much more value than almost any reader will ever appreciate. Not only has he provided three solid approaches, he includes an insight into the strategic thinking found in many of the best traders!" -Glen Ring, President, Glen Ring Enterprises Analyst and publisher of *View on Futures* newsletter and *Daily Update* "For traders wondering what to do with all those technical indicators that are part of their charting software packages, Tom Bierovic offers three trading systems that use combinations of their inputs to generate specific buy and sell signals. Moreover, Bierovic offers enough variations and trading concepts so that enterprising readers should have no trouble devising their own trading systems based on this compact, but idea-filled, text." -Jack Schwager, Author of *Market Wizards* and *The New Market Wizards* "A carefully crafted book and well thought-out selection of some of the best techniques. The analytical tools are that much more valuable because the author has employed them in his own trading program and refined them to reflect a good technical analysis foundation on which to build and succeed." -Timothy Slater, Former Managing Director of Dow Jones Seminars, Computrac Technical Analysis Software Corporation

About the Author
TOM BIEROVIC, President of the Synergy Trading Group, has been trading stocks and futures successfully since 1971. Tom is also a popular and respected speaker; he has presented highly rated seminars on technical analysis and trading at major conferences throughout the United States and in more than forty countries on six continents. *Futures* magazine, *Futures World News*, and *Technical Analysis of Stocks Commodities* magazine have all published in-depth interviews with Tom, and he is featured in the book *Real People, Real Traders* by Toghraie and Ruggiero.
