Stuart John Barton : Policy Signals and Market Responses: A 50 Year History of Zambia's Relationship with Foreign Capital (Palgrave Studies in the History of Finance) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Policy Signals and Market Responses: A 50 Year History of Zambia's

Relationship with Foreign Capital (Palgrave Studies in the History of Finance):

The study presents archival evidence to show how President Kaunda raised political and economic exclusivity in Zambia in the early years of Zambia's independence, and how this retarded capital investment. Despite formal reforms and a new government, this institutional mechanism still dominates and constrains Zambia's political economy today.

'The book is very well written. The theoretical insights from a wide range of organizational and investment theories are woven into the text so as to assist the reader in following the systematic course of the destruction of the economic potential of newly independent states.'
