Boris Sosnizkij : Problem Solving with Quantitative Methods / Decision Making before purchasing it in order to gage whether or not it would be worth my time, and all praised Problem Solving with Quantitative Methods / Decision Making:

Seminar paper from the year 2003 in the subject Business economics - Investment and Finance, grade: 1,2 (A+), University of Lincoln (International Business Administration), language: English, abstract: The business world is full of decisions, which are always (more or less) important to guarantee the success of a specific organization. There are many techniques that help people solve the problems they have. This assignment will deal with Quantitative methods of Decision Making. It will describe a German company that is one of the world leading companies in that sector. After

explaining its business and activities I will show up a problem within this organization an offer an adequate solution of the presented problem in form of a business report.
